PROFESSIONAL EXPERIENCE

Software Developer

Redvinca Tech Pvt Ltd, Mumbai, Maharashtra

(May 2024 - May 2025)

- Contributed in the development of an e-commerce platform for cakes and bears, using Next.js for responsive frontend and Spring Boot for scalable backend.
- Collaborated to enhance performance, fix bugs, and deliver solutions, boosting user experience and business growth.

Java Developer (Internship)

Squad Infotech Pvt Ltd, Mumbai, Maharashtra

(Mar 2022 - Feb 2023)

- As a Java Developer Intern, I contributed to developing and maintaining Java applications, implementing backend functionality and business logic using core Java concepts such as OOP, collections, exception handling, and JDBC.

TECHNICAL SKILLS

- Languages: Java, JavaScript | Frameworks: Spring Boot, Hibernate, ReactJS, NextJS |
- Databases: MySQL, SQL, Neon DB | APIs & Backend: RESTful APIs (JSON), Microservices, JWT |
- Tools: Git, GitHub, Maven, npm, Docker, Render

PROJECTS

[Okaygenie.com](#)

- Contributed to OkayGenie.com, a platform connecting local businesses with customers and streamlining operations.
- Developed features to automate store processes, enhancing efficiency for small retailers.
- Built scalable solutions to support small businesses in adapting to eCommerce trends.

[Cold Open | VS Code Extension](#)

- Engineered a productivity tool to replace generic placeholder text with dynamic, chainable quote generation using a custom Completion Provider and Regex-based parser.
- Published to the VS Code Marketplace, ensuring cross-language compatibility for 20+ programming languages and managing the full release lifecycle.

[Flow Finance | Full-Stack Expense Tracker](#)

- Developed a full-stack financial app using Spring Boot and React for real-time expense management.
- Integrated JWT and Spring Security to ensure secure, stateless user authentication.
- Managed data persistence using RESTful APIs and PostgreSQL (Neon DB).

[PopTart | Android App](#)

- Engineered a music discovery tool that leverages the Last.fm API and custom filtering logic to isolate underrated artists by bypassing mainstream metadata.
- Optimized the build ecosystem by migrating to Kotlin DSL, ensuring type-safe dependency management and a streamlined development lifecycle.

EDUCATION

B.Sc. in Information Technology Thakur College of Science & Commerce, Mumbai, Maharashtra

Graduated: **2022**
